# Jieru Hu

1823 Minor Ave, APT 912Seattle, WA, 98101

Email: hjr01211@gmail.com Phone: (608) 770-9836

github.com/JerryHu1994 www.linkedin.com/in/jieru-1994

#### EDUCATION

#### University of Wisconsin Madison

Bachelor of Engineering - Mechanical Engineering (Graduated with Honor)

Bachelor of Science - Computer Science

Bachelor of Science - Mathematics

Dean list every semester

Aug 2013 - May 2018

Madison, WI

GPA: 3.85/4.00

#### CourseWork

Data Structure, Machine Organization & Programming, Numerical Methods, Probability Theory, Algorithms Linear Programming, Operating System, Artificial Intelligence, Computational Geometry, Computer Networks Numerical Analysis, High Performance Computing, Data Science, Machine Learning & Deep Learning (Coursera)

#### EXPERIENCE

## Software Development Engineer

Seattle, WA June 2018 - Now

Amazon

- Gateway development for Amazon India

### Undergraduate Research Assistant

Wisconsin Human-Computer Interaction Laboratory

September 2017 - June 2018

- Implemented the trajectory motion planning for 6-DOF Kinova MICO arm with MoveIt framework
- Developed python scripts in ROS to execute various industrial manufacturing tasks with MICO arm
- Designed and built the communication interface between NodeJS UI server and Python Http server

## Software Engineering Internship

Seattle, WA

Madison, WI

Amazon

June 2017 - August 2017

- Designed and implemented Screenshot Social Sharing feature into Kindle iOS App production in Objective-C
- Built Java Coral service APIs to store Encoded Voice data into AWS S3 bucket within Guice framework
- Developed the voice annotation feature in Kindle iOS notebook with an End-To-End model to synchronize client voice data across multiple devices

#### Student Software Engineer

Madison, WI

Morgridge Institute for Research - Software Assurance Marketplace(SWAMP)

January 2017 - May 2018

- Enriched Perl and SQL scripts to display complete code analysis details on the Result Viewer Page
- Developed a low memory-consuming backend service in C to parse code assessment result from XML into JSON
- Upgraded and documented the SWAMP Perl runtime version from 5.18.1 to 5.26.1 on CentOS
- Implemented a trigger in PHP server to launch automatic assessment of new code by GitHub Webhook event
- Organized and stored SWAMP assessment result data into MongoDB

## Undergraduate Research Assistant

Madison, WI

Engine Research Center

March 2018 - May 2018

- Parallelized engine simulation code in python with different input temperature and pressure combinations
- Prepared HTCondor job submit scripts and managed engine simulation jobs in HTCondor Cluster

## Projects

- DataScience on Used Car: Crawl and clean data from Cars.com, followed by entity-matching and query analysis
- Texture Synthesis on GPU: Parallel Implementation of Texture Synthesis on CUDA architecture
- Name Extraction from IMDB Comments: Learning-based information extractor implemented with cross-validation on five machine learning methods, which extracts person names from natural text
- Breast Cancer Diagnosis: Use quadratic programming methods to calculate SVM based on clinical datasets and predict malignancy in diagnostic procedure
- Computational Geometry in Python: Constructed and maintained Delaunay triangulation and Voronoi diagram for arbitrary set of points in the plane with a self-designed data structure capable of answering geometric queries
- Tic Tac Toe in React: Implemented an interactive tic-tac-toe game in the ReactJS framework SKILLS
- Languages: Java, Python, C, C++, Obj-C, MATLAB, Perl, JavaScript, SQL, PHP, Bash, R, HTML, CSS, XML, JSON, Latex
- Technologies: CUDA, OpenMP, MPI, ROS, Xcode, iOS-SDK, OpenCV, MySQL, MongoDB, MariaDB, Git, Tensor Flow, scikit-learn, Pandas, Guice, ReactJs, Laveral
